

The Risk of Masks

AUSTRALIAN SOVEREIGNTY ALLIANCE

There is a lot of information out there regarding the dangers of wearing face coverings, particularly for extended periods of time. Even without the studies, most of us can feel the impact of covering our faces where we should naturally have clear access for clean oxygen intake. Our lungs are a detox pathway, meaning we breathe out waste our bodies do not require. That waste gets caught up in face coverings and breathed back in, putting you at risk of health problems, including PTSD, anxiety, respiratory and skin issues. It substantially increases health risks to children and those with poor health. It goes against fundamental human rights to force or coerce anyone into doing something that can have a negative impact on their wellbeing.

A recent study came out that showed there is no evidence that masks stopped any transmission of COVID-19. See studies below.

If you do choose to wear a face mask, according to many health and safety resources, you must ensure it is changed every 20 minutes or anytime you touch it. The material otherwise becomes a breeding ground for bacteria.

Also be very aware of the type of material used. Cloth masks put your health at greater risk (see studies below) and disposable masks often contain harmful chemicals. Be informed and research thoroughly.

Your Rights

1. People with a medical condition and children under 12 are not required to wear a mask according to the QLD Health Department. As stated on their website, you are not required to wear a mask "when a mask creates a risk to health and safety".
2. You are not required to present a medical certificate or disclose personal medical information. This is also listed on the QLD government website. It is also a breach of the Privacy Act 1988.
3. Businesses cannot discriminate, harass or coerce their staff or customers into wearing masks. This is a breach of the Commonwealth Discriminatory Act 1992 (sections 6 & 24). This includes discriminatory signage.

Mandatory masks are a breach of fundamental human rights. You do not need to comply.

Disclaimer: any action taken from this information is solely your responsibility. This is not legal advice.

Research the dangers of masks yourself. This is just the tip of the iceberg:
